Join the March to Victory

Stop water waste and you help win the war.
Fuel pumps the water into your house. Chemicals purify it. Precious transportation space delivers these materials to this company.

Wanted water means a waste of fuel, chemicals and transportation space—all urgently needed in the war effort.

You can help speed the day of Victory by preventing water waste.

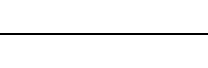

Have plumbing leaks repaired immediately.

Don't leave the garden hose or siphoner on all night. Shuts more urgent to turned off each time you flush using the hose.
